

SkillAid

We're Ed-Tech Company constantly working on gearing up Technical knowledge of Under-Grad Students through Our interactive Programs taught and practiced by Experts coming from Major Industries and Innovation-first Companies.

PROGRAM MODULES

Technical Workshops & Certification Courses

Internship with Industry Exposure

Training and Placement Assistance

Career Guidance

OUR AIM

“To bridge the gap between Industry and Academia” by providing “Industry Specific skill Training” to engineering students by setting up an Industry skill development centre inside engineering Institutions. The centre will train the students in various skills by Industrial Subject Matter Experts (SME’s) to become Industry Ready.

”

" We provides practical tools & techniques..! Not text book theories"

Why SkillAid?

The idea is born:

- Problem faced by most of the students
- Problem faced by Industries due to unskilled graduates.
- Competency gap between industry and academia
- Overall development of students

Student Testimonials

”

Super worthy!!! That's the only I can describe about the internship I attended...

Though it was just 7 days I have really learnt many things

Shraddha tiwari, 3rd year IARE, Hyd

”

Seriously believe me! No place you can get better opportunity to meet experts of automotive industry and meet them directly. Learning from experts was so new experience and so motivating that you wish to do something great in upcoming years.

The practical sessions let you view engine inside out which you normally are not able to do and at last the project given is so good that you wish to keep on working on it! Just close your eyes and register yourself. It I'd more worth of money that you will spend.

Ramana, MREC, Hyd

”

Fabulous! A Much needed experience for every individual who aspires to work for Industry in Future.

Escalate the Extra Edge into your Personality! Get Industry Ready with SkillAid!

Adithya, VNRVJIET, Hyd

& many more.....

Training Areas

We provide 16/24/50 hours customized/standard training programs for Engineering Students & Institutions.

Our Training areas Include:

- Automobile Engineering
- Mechanical Engineering
- Civil Engineering
- Electronics and Communication Engineering
- Aerospace Engineering
- Computer Science & Engineering
- Business & Management

Automobile/Mechanical

- Automotive Power Train Engineering
- Automotive Designing & styling
- Automotive Assembly Line Engineering
- Automotive Electronics
- Diesel Engine Engineering
- Vehicle Design Engineering
- Advanced IC Engine design & Development
- Automotive sketching
- Industrial Design Engineering (Idea to Product)
- Computational Fluid Dynamics (CFD)
- Non Destructive Testing (NDT)
- Industrial Hydraulics & Pneumatics and more...

Benefits to Host Institution

Strong Industry Institute Interaction.

Industry oriented short term programs & Activities.

Nation Wide Branding activities through our marketing campaign.

Industry expert network.

Career Guidance for Host Institution Students.

Periodic Industry Focused Faculty Skill Improvement Programs.

Continues Improvement of Student Quality as per current Industry Standards and Requirements.

Revenue generation for Host campus.

Future plans of establishing Research and Innovation centre to bring Industry Projects.

All of the above with 'No additional Investment' from Institution.
